

SFD™ setups for sports boat and party boats.

How to hook up and descend a rockfish

Catch fish and open SFD™ with one hand while holding rockfish. Insert SFD™ through thin part of lower lip membrane. Lower fish into the water as shown above. Throw weighted lure or weight over with reel in thumb free spool and descend fish to recovery depth. When fish signals by tugging, quickly snap line upward to release fish. On the fishing setup lower your rig to bottom and continue fishing. "Helping our fishery resources is everybody's business!"
